myDataSenseSM CARE: CLINICAL ANALYTICS RESULTS ENGINE

CARE represents an industry leading clinical pharmacy data product that is only one component of the myDataSense workers' compensation business intelligence program.

myDataSense CARE achieves superior clinical results through actionable intelligence while bridging the gap between analytics and clinical pharmacy. An innovation that delivers utilization and outcomes measurements, CARE is built on a multi-faceted program targeting a wide array of clinical utilization patterns throughout the lifecycle of a claim.

CLINICAL UTILIZATION PATTERNS

myDataSense CARE: THE FUTURE OF CLINICAL ANALYTICS NOW

- Identifies and measures critical utilization patterns for every patient daily
- Detects at-risk patients using a health safety score known as CARE Score
- Illustrates a targeted analysis of intervention outcomes
- Broadcasts custom messages based on evidence-based thresholds
- Custom delivery as interactive dashboards, reports and raw data formats

myMatrixx myDataSense CARE is an Advanced Data Tool to Measure and Manage Patient Pharmacotherapy Risk

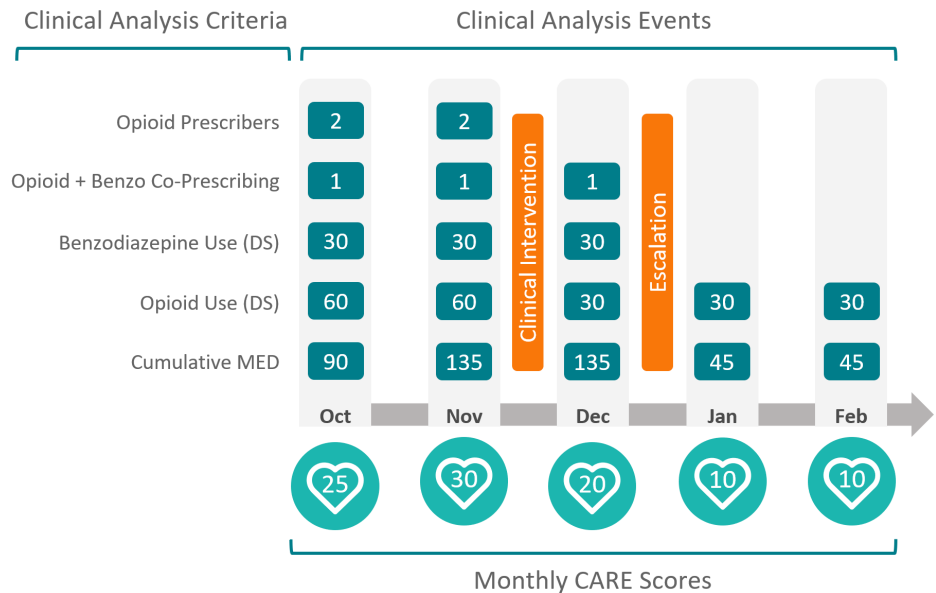

THE NEXT GENERATION OF CLINICAL ANALYTICS NOW

Through myDataSense CARE Analytics and CARE Scores, our clients achieve an elevated understanding of a patient's overall drug utilization as well as curated pharmacotherapy risk scores.

Combined with intervention data, CARE provides unprecedented visibility into the effectiveness of interventions.

CARE provides real time monitoring to continuously assess the risk versus benefit of drug therapy.

FULLY CUSTOMIZABLE INTERACTIVE DASHBOARDS

myDataSense CARE is delivered through a series of interactive dashboards providing insights into utilization trends as well as current and predicted patient pharmacotherapy.

CARE dashboards are user-friendly and can be used online or offline. In addition, CARE dashboards can be fully customized for clients.
