myDataSense℠

myMatrixx®
An Express Scripts Company

myMatrixx myDataSense℠ DELIVERS POWERFUL, AGILE AND HIGHLY CUSTOMIZABLE DATA

WORKERS' COMPENSATION BUSINESS INTELLIGENCE

At myMatrixx®, we remain at the leading edge of digital transformation for Workers' Compensation. We draw the maximum value by implementing a proprietary Business Intelligence program, called myDataSense℠, that transforms data into timely, relevant and actionable insights for our clients.

Since "one-size" does not fit all, we engage our clients in a consultative method that delivers answers to your questions:

- What happened?
- What is happening?
- What will happen?

- What should we do if it happens?
- What else should I know?

Curated Program Analytics
Delivering Actionable Insights from Pharmacy Trends

DATA-DRIVEN RESULTS

With myDataSense, our solution is simple: help our clients better manage their programs by revealing key measures that will enhance patient safety and drive savings. Our data-driven culture, clinical pharmacy expertise and high touch customer service model are the catalysts for a comprehensive program that delivers answers using a wide set of innovative data products.

Our clients have unique and evolving challenges. We employ a customized approach to all of our data product offerings at every level of your program — including advanced analytical solutions, interactive dashboards and custom reporting. Timely delivery is crucial to us. Our clients benefit from the myDataSense automated, agile approach that elevates visibility to those key measures when they matter most.

Partnering in Data Research, Analysis and Results

myMatrixx myDataSense Drives Efficient Program Management

## BEST-IN-CLASS DATA PRODUCTS AND TECHNOLOGY

Collecting and measuring Workers' Compensation pharmacy data requires a distinct approach, different than what you might expect from a group health solution. myDataSense is a workers' comp centric analytics platform using the latest tools and methodologies. The result is a comprehensive solution that delivers a set of data products with high customization, agility and data integrity.

We evaluate data from a variety of sources — pharmacy events, prescribers and drug references. We also collect claim and financial data not related to pharmacy that reveal additional insights that measure and validate patient outcomes.

myDataSense delivers answers and insights in a format that is easy to understand and apply.

CUSTOMIZED INSIGHTS INTO CLAIMS MANAGEMENT

Whether we are delivering an advanced clinical solution such as myDataSense CARE (Clinical Analytics Results Engine), interactive dashboard or data requests, our team will refine the output to your exacting standards.

At myMatrixx, the myDataSense team is staffed with data experts that develop and manage every aspect of the program, independent of other IT programs. Our clients benefit from this approach as data requests are prioritized and always procured by the myDataSense team. We are the one-stop-shop for our client's pharmacy analytics.

For more information about myDataSense, please contact us at Analytics@myMatrixx.com.
